CATALOGUE

CLOTHES THAT ARE PERFECT FOR THE PURPOSE

DIMEX CLOTHES ARE DESIGNED for workmen and women seasoned in harsh conditions. Our basic idea is to make clothes that are perfect for their purpose, and we think that the people who wear Dimex clothes every day have the real expertise and can tell us what works and what doesn't.

Dimex clothes have been designed to be comfortable with high-quality materials and seams that don't rub or chafe in the wrong places. Well-fitting trousers won't tear. The Dimex clothing range is kept simple and straightforward – honed to perfection – i.e. made as functional as possible. It has everything you need, with no unnecessary gimmicks.

We don't do throwaway clothing and are all about slow fashion. Dimex clothes are typically worn for so long that they are either falling to pieces or covered in so much muck that they can practically stand unaided. As a result, you rarely see Dimex clothes being sold at a second-hand shop or upcycled as parts of cute craft projects – which suits us just fine.

Our clothes have been tested for safety and comfort by the thousands of Dimex fans across the globe, who will settle for nothing but the best when it comes to workwear. **We offer only the best, and that's why Dimex is Finland's number one workwear brand.**

HIGH VISIBILITY CLOTHING

WEARING DIMEX IN ANY KIND OF WEATHER.

Come sleet or high water, Dimex won't let you down. Put to the test in the unpredictable Finnish conditions, the Dimex winter clothing beat the autumn sleet & slush as well as winter frost hands down. The hi-vis clothing also makes sure you get noticed in the dark.

SAFETY WINTER JACKET

Our Dimex TRIBE

ALL COMPANIES TEND TO SAY THEIR CUSTOMERS ARE THE BEST EVER. But g*d-dammit, they have yet to meet our “Dimexheimo” tribe! The people who wear our clothes are a breed of their own – their attitude towards work and life is just simply bloody fantastic.

HIGH VISIBILITY CLOTHING

MADE TO LAST

WE WANT YOUR DIMEX to last from one generation to the next. When clothes are well-designed, functional and made of the right materials, their lifespan increases, thus reducing the burden on the environment.

The Dimex clothes are also continuously improved. The tweaking and honing doesn't stop until the product functions perfectly – and that's why Dimexes also look and feel so darn good on you.

WINTER JACKET 6101 ❄️

Dirt-repellent and warm jacket protects from slush and sh*t!
page 12

NEW!

WOMEN'S MULTI WINTER JACKET 2339 ❄️

Hi-vis, well-fitting winter jacket that keeps you warm and protected, suited for the more difficult jobs. Usually, the problem with this type of protective jacket is that hard, "crunchy" fabric in sub-zero temperatures, but ours feels extremely comfortable on.

Chest pocket with zipper, vertical pull-out ID-card pocket inside the right chest pocket. Inside pocket with zipper. Lower pockets with zipper. Adjustable cuffs and hem with velcro tapes. Extended back hem. Front list, long protective list under the front zipper. Reflective tapes 50 mm. Wash at 60 degrees.

When worn with Dimex Multi-trousers complies with High visibility protection class 3. When performing fire work, the standard-compliant jackets and trousers must be worn together.

Material: 75 % cotton, 24 % polyester, 1 % antistatic fiber, 310 g/m² | Safe TM -quilted lining, 100 g/m² | HV-yellow/grey **Size:** XS-3XL **Standards:** EN ISO 20471:2013 class 2 | EN ISO 11612 A1, B1, C1, E1 | EN ISO 11611 A1, class 1 | EN 1149-5:2008 | IEC 61482-2:2018 class 1 (4kA) | EN 13034, type 6

PINK EFFECTS

EVERYDAY

PRACTICAL CLOTHES FOR YOUR EVERYDAY

NEEDS. Clothes in the Dimex Everyday range are designed for real work and have been tested on real working environments, but they have not been certified according to the protective clothing or high-visibility standards. Dark garments hide dirt and stains well, and the Everyday clothes also have plenty of pockets, functional details and reinforced fabric in areas that are prone to wearing and tearing.

WASHING AND TAKING CARE OF YOUR WORK CLOTHES

ALL TOOLS AND EQUIPMENT NEED REGULAR CARE AND MAINTENANCE – workwear included. Proper maintenance and washing help retain the qualities of your workwear longer. A dirty or worn piece of workwear not

only looks scruffy and bad, but it may also lose its protective and high visibility qualities. It's also important to replace workwear frequently enough.

Wash and remove the traces of all the hard work

- * Wash the clothes frequently enough. Dirt wears fabric out faster than washing.
- * Do up the velcro and snap fasteners as well as zippers before washing.
- * Do not wash full loads (fill the machine only to 60–80 % of the capacity). This way you can minimise possible damage caused by wrinkling or abrasion and the clothes also get cleaner.
- * Always wash the EN-coded protective clothing separately and inside out. This way the reflective tapes maintain their reflective properties for longer.
- * Avoid soaking, especially clothes with reflective tapes.
- * Do not use steam when ironing reflective tapes.
- * Keep flame retardant clothing clean.
- * Do not use bar or liquid soap when cleaning flame retardant clothing.
- * Rinse carefully.
- * If you use a tumble-dryer, remove the clothes from the dryer when they are still a little damp. Over-drying can cause shrinkage.
- * As a rule, wash workwear in 60°C.
- * Always follow the washing instructions on the labels of your clothes.
- * Store the clothes preferably on hangers, protected from sunlight.

**A WORKMAN'S UNIFORM
IS WORN WITH PRIDE**

CERTIFIED SAFETY AND QUALITY

CERTIFIED CLOTHING is a must in many different working environments as their protective and high visibility features protect the health and lives of those wearing them. That is why certified workwear must undergo a

multi-stage approval process, in which the materials must meet the strict quality standards. **Our products meet the following European EN standards and have been issued these certificates:**

EN 20471:2013.....	High-visibility clothing.
EN 1149-5.....	Protective clothing - Electrostatic properties - Material performance and design requirements.
EN ISO 11612	Protective clothing - Clothing to protect against heat and flame.
EN ISO 11611.....	Protective clothing for use in welding and allied processes.
EN 13034, Type 6	Protective clothing against liquid chemicals.
EN 343.....	Protective clothing - Protection against rain.
EN 342.....	Protective clothing - Ensembles and garments for protection against cold.
IEC 61482.....	Protective clothing against the thermal hazards of an electric arc.

- The measures are indicative only.
- You'll find the best fit by trying the clothes on.
- If your measurements fall between two sizes, choose the smaller size.
- The measurements used in the charts are in centimetres.
- The measurements are body measurements.
- Ease allowance has been taken into consideration in our patternmaking.
- The movement ease varies from model to model.

CHILDREN'S SIZES:

Sizes	90	100	110	120	130	140	150	160	170
A. Chest	54	56	60	64	68	72	78	83	87
B. Waist	53	54	56	58	61	64	68	71	74
C. Hip	58	60	64	68	71	75	81	86	90
D. Inside leg	37	44	47,5	54,5	60	65	71,5	76	80,5

How to measure your body:

- A Chest:** Measure around the widest part of your chest.
- B Waist:** Measure around the slimmest part of your natural waistline, 1–2 cm above your navel.
- C Hip:** Measure around the fullest part of your bottom.
- D Inside Leg:** Measure the inside of your leg from the crotch to the floor.
